先记这些，够用再加

按英语二图表大作文整理。先背两种开头，再背一套共用的后两段；句型表是拆开的复习卡，不必再背一遍。

六个基本句型

The chart shows [TOPIC].
图表显示……。表格把 chart 换成 table；TOPIC 填名词短语。

The figure for [A] rose from [X] to [Y].
A 的数值从 X 升到 Y。下降用 fell；稳定用 remained stable at [X]。

The figure for [A] is [X], while that for [B] is [Y].
A 的数值是 X，而 B 是 Y。百分比和普通数值都能用。

There are two possible reasons for this pattern.
这一特点可能有两个原因。后面用 First 和 Second 接两点。

As a result, [SENTENCE].
因此，……。后面写完整句子，说明原因带来的结果。

We should [DO].
我们应该……。DO 填动词原形开头的短语，如 provide more activities。

原因只备三组，选与题目有关的两组

People have more money to spend. / They can afford [THINGS].
消费、出行、产品普及：人们有更多钱 → 买得起……。THINGS 填名词。

[ACTIVITY] can help people relax. / It allows them to enjoy their free time.
休闲、旅游、兴趣活动：能让人放松 → 享受闲暇。ACTIVITY 用动名词短语，如 reading books。

[ACTIVITY] is easy to do. / People can do it without spending much time or money.
方便、省时、省钱：容易参与 → 时间或金钱门槛低。按图表实际选择理由。

小作文顺手记两句

I am writing to [DO]. / I look forward to your reply.
我写信是为了…… / 期待回复。DO 可填 invite you to… 或 offer some suggestions on…；期待回复只用于需要回信的场合。

目标是切题、数据准确、句子写对。模板覆盖常见动态图和静态图；原因与建议要随题目换，不能只换题目名称。

模板一 · 有年份，看变化

适合比较不同年份的数量、比例或金额。折线图、柱状图、饼图、表格都可能是动态图，关键看有没有时间变化。

第一段 · 描述变化

The chart shows changes in [主题] from [起始年] to [结束年]. The figure for [项目甲] rose from [原数值] to [后数值]. Meanwhile, the figure for [项目乙] fell from [原数值] to [后数值]. Overall, [总体特点].

主题填指标与对象，如 the number of public libraries in a city。总体特点写完整句子，如 both figures increased during this period。上升用 rose，下降用 fell；只有一项时，删掉 B 那句。

第二段 · 两个原因（两篇完全相同）

There are two possible reasons for this pattern. First, [原因一]. As a result, [结果一]. Second, [原因二]. This means that [结果二]. These two factors may help explain the figures shown in the chart.

原因和结果都填完整句子，主语、谓语不能少。先写第一个原因及结果，再写第二组；填空处结尾不用重复加句号。

第三段 · 一句评价，一条建议（两篇完全相同）

In my opinion, [简短评价]. We should [具体建议]. This can help [人群] [获得的好处] and make a positive difference to their daily lives. When making plans, we need to consider their actual needs and give them more practical support.

评价填完整句子；建议和好处填动词原形开头的短语；人群可填 students、older people 等。

使用时只改题目内容

红色括号是需要填写的内容。数据不止一项时补第二项；只有一项时删去 Meanwhile 那句。第一段的动词要按实际变化选，不能把所有项目都写成上升。

完整套用见第 4 页。示例用近年的动态图真题，题目中的 health literacy 可直接使用，不需要另找高级替换词。

写完按题面检查词数，通常约 150 词。过去的年份用过去时，分析一般原因通常用现在时。

模板二 · 没有变化，看高低

适合同一时间的比例、偏好、目的、收获、满意度等。数字不一定是百分比；比较的是数量时，直接写数量和单位。

第一段 · 描述差异

The chart shows [主题]. Among all the items, [项目甲] has the highest figure, at [数值], followed by [项目乙] at [数值]. In contrast, the figure for [项目丙] is only [数值]. Overall, there is a clear difference between these items.

主题交代对象和内容，如 the leisure activities of older people in a community。甲、乙、丙填具体项目及相应数值。只有差距明显时才保留 clear difference；项目更多时，可补一句其他数据。

第二段 · 两个原因（两篇完全相同）

There are two possible reasons for this pattern. First, [原因一]. As a result, [结果一]. Second, [原因二]. This means that [结果二]. These two factors may help explain the figures shown in the chart.

原因和结果都填完整句子，主语、谓语不能少。先写第一个原因及结果，再写第二组；填空处结尾不用重复加句号。

第三段 · 一句评价，一条建议（两篇完全相同）

In my opinion, [简短评价]. We should [具体建议]. This can help [人群] [获得的好处] and make a positive difference to their daily lives. When making plans, we need to consider their actual needs and give them more practical support.

评价填完整句子；建议和好处填动词原形开头的短语；人群可填 students、older people 等。

使用时只改题目内容

红色括号是需要填写的内容。项目超过三项时，可加一句其他数据。多选调查的比例可以超过 100%，不要一律写成“占总数”。

完整套用见第 5 页。示例用 2026 年静态图真题，保留原来的句架，按题目补齐四项调查结果。

背诵顺序：先背两种第一段，再背共用后两段，最后记三组原因。后面的两篇示例只用来学怎么填，不必整篇再背。

使用示例一 · 2023 年真题

动态图：我国居民健康素养水平。对应模板一，只有一个变化指标，删掉第二项数据句。

题目要点

图表数据摘录：2012 年 8.80%；2016 年 11.58%；2021 年 25.40%。整体上升，后期增长更快。

红色粗体＝按本题填写或调整的部分；黑色＝原模板句架。

完整套用 · 141 词

The chart shows changes in **Chinese residents' health literacy** from **2012** to **2021**. The figure for **health literacy** rose from **8.80%** to **25.40%**. Overall, **the level increased greatly during this period**.

There are two possible reasons for this pattern. First, **people pay more attention to their health in daily life**. As a result, **they are more willing to learn basic health knowledge**. Second, **health information is easier to find online**. This means that **more people can learn how to stay healthy**. These two factors may help explain the figures shown in the chart.

In my opinion, **this increase is a positive change**. We should **provide more useful health information**. This can help **residents develop healthy habits** and make a positive difference to their daily lives. When making plans, we need to consider their actual needs and give them more practical support.

套用时留意

这里删掉了模板中的 Meanwhile 那句，其余句架保留。两个原因是合理解释，不是图表已经证明的事实，所以仍用 possible、may。健康素养指获取、理解并运用健康信息的能力，不等于身体健康状况。

使用示例二 · 2026 年真题

静态图：某项关于儿童户外活动看法的调查。对应模板二，四项数据写齐。

题目要点

满足好奇心 54.60%；促进观察力 54.50%；强身健体 37.20%；增强亲子互动 33.20%。前两项接近，均高于后两项。

红色粗体＝按本题填写或调整的部分；黑色＝原模板句架。

完整套用 · 160 词

The chart shows **people's views on children's outdoor activities**. Among all the items, **satisfying curiosity** has the highest figure, at **54.60%**, followed by **improving observation skills** at **54.50%**. In contrast, the figure for **physical fitness** is only **37.20%**. **The figure for parent-child interaction is 33.20%.** Overall, there is a clear difference between **the first two items and the other two**.

There are two possible reasons for this pattern. First, **outdoor activities offer new experiences**. As a result, **children can learn through observation**. Second, **parents are often busy**. This means that **they may spend less time playing outdoors with their children**. These two factors may help explain the figures shown in the chart.

In my opinion, **all four benefits are important**. We should **arrange more family outdoor activities**. This can help **children learn and stay healthy** and make a positive difference to their daily lives. When making plans, we need to consider their actual needs and give them more practical support.

套用时留意

第四项用 The figure for… is… 补上，避免另背新句型。前两项几乎相同，结尾的对比改成“前两项与后两项”。写的是受访者认可哪些益处，不能把百分比写成儿童实际参加活动的比例。
