模板套用案例：（红色为模板句，黑色为自己填充）

2011 年（动态）

The bar chart above shows (the change of) the market share of (several) car brands in China between 2008 and 2009. It can be seen that the market share of the Chinese car brand rose sharply from 25% in 2008 to 35% in 2009. In contrast, Japanese car brand witnessed a decrease from 35% to 25% during the same period. Meanwhile, American car brand remained stable.

Several factors could weigh heavily for this phenomenon. Yet, suspended at the top of the list are the following two aspects. For one thing, with the the rapid economic growth and social transformation, people in mounting numbers begin to change their consumption mentality, laying emphasis on purchasing domestic car brand. For another, historical factors also prove responsible for this phenomenon in that people want to express their passions to their own country through selecting Chineses car brands instead of Japanese/foreign car brands , which exerts significant influence on their behavior.

Based on the statistics and analysis above, we may reasonably predict that the trend is normal and positive and therefore I firmly believe that it is bound to continue in the years to come. (190 字)

2016 年（静态）

The pie chart clearly shows (the survey of) traveling purposes of students in a certain university. It can be seen that enjoying the scenery accounts for the largest part, with the proportion of 37%, followed by relieving pressure which takes up 33%. In contrast, developing independent skills and making friends only occupy a minor proportion of 9% and 6% respectively.

What exactly contribute to this phenomenon? It is a thought-provoking question. Although traveling to different places, to some extent, may cost money, it, from my perspective, proves very worthwhile as it will help students broaden their horizon. What's more, that a majority of undergraduates begin to attach importance to relieving pressure is mainly due to the fact that they are exposed to tremendous academic stress. Last but not least, the ability of making friends and living independently play a vital role in their college life.

Based on the statistics and analysis above, we may reasonably predict that the phenomenon is normal and positive and therefore I firmly believe that it is bound to continue in the years to come.//Based on the statistics and analysis above, it can be concluded that college students are able to benefit a lot from traveling/taking a trip in many aspects.
